

# EXHIBIT 2

Matt Hoppes

September 1, 2016

311-98

Should I have any concern regarding the MCC and MNC being fictitious or belonging to another company?

**Jesse Raasch** All operators using our cloud core will be using the same MCC and MNC (31198).

**Matt Hoppes** Right, but what happens if a user of MCC/MNC 311-98 actually comes into the area? Wouldn't that cause some kind of confusion in the cellular matrix?

**Jesse Raasch** We will be implementing a feature soon which will allow only SIMs associated to your account to connect to your base stations. Only BaiCells uses 31198.

**Matt Hoppes** **Jesse Raasch** Is 311-98 a BaiCells MNC through GSMA then?

**Matt Hoppes** If I want to get my own MNC, can I do that with the current cloud core?

Like · Reply · 3y

**Jesse Raasch** **Matt Hoppes** I'm not sure how Beijing registered the MNC code, but I will ask them about it. We will have a feature for adding other third-party SIMs to the cloud core.
